

Possible Ozone NAAQS

- The following maps show the parishes that would be nonattainment with an ozone NAAQS of 60, 65, or 70 ppb.
- The parishes that are completely shaded orange have an ozone monitor that indicates nonattainment.
- The parishes with orange stripes are part of a metropolitan statistical area (MSA) and would possibly be included in the nonattainment areas if EPA designates nonattainment by MSA's.
- The green shaded parish has an ozone monitor that indicates attainment. The parish with green stripes is part of that MSA.
